Information Disclosure Statement

1. The information disclosure statement filed on 9/16/02 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. The missing references are the foreign patents. The IDS has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-2, 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Sankey et al (US 6,065,594). Sankey et al disclose a storage container comprising a bottom wall 50 defining an opening. A retaining device 300 connected to the bottom wall. The retaining device including a bridge 354 having first and second end. The first and second end of the bridge disposed on opposite sides of the opening. The first and second ends are disposed on the ends of inclined walls 356 and are parallel with the bottom wall. The inclined walls are connected to an upper wall. A push button is disposed on the bridge and spaced from the arm 364. The fixed support occupies the area not adjacent the first and second ends.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sankey et al in view of Official Notice. It would have been obvious to make the thickness of the ends walls less than the bottom wall to facilitate bending of the arms and for economic reason.
- 6. Claims 5-7, 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sankey et al. Sankey teaches that more than one resilient arm such as arms 64 can be disposed on opposite sides of a pushbutton. It would have been obvious to make that modification into the embodiment in Figure 13.

Allowable Subject Matter

7. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion
